P2TR215CL Wireless In-Ear Monitoring (IEM) System

Wireless in-ear monitoring provides much more mobility on the stage and effectively eliminates the need for stage monitors, thus offering the performers a much roomier stage and a feedback-free environment for the house and monitor engineers.

This is a multi channel, 8 frequency UHF wireless monitoring system consisting of the P2T transmitter, a combination transmitter and dual input mono mixer, the P2R receiver, and the SE215 stereo earphones. The SE215 use Dynamic MicroSpeakers to deliver clear, natural audio

with an extended bass response for a rich, lifelike listening experience.

Aural Exciter enhances sound quality by "opening up" a sound source, adding clarity and definition without changing level or adding distortion. Optical Big Bottom provides low-frequency punch, without the unwanted level boost that comes from increasing low-end EQ. Benefits are deeper, more resonant, detailed bass with tighter articulation, extending the low frequency spectrum for a richer, more percussive sound, even at very low volume levels.

Audio Camera Balun

18" XLR-F to 1/8" cable enables professional mics to be connected to the EOS 5D and EOS 7D DSLR cameras. Sophisticated Balun technology results in an audio cable that maintains a low-noise, balanced signal for up to 2000' in range.
